Blackview Watches

Kids smartwatch checklist: a printable family worksheet

This blank worksheet helps a family keep model-specific questions and observations together. It is a retailer resource, not a manufacturer manual or a guarantee of safety. Keep completed records private; do not put passwords, pairing codes or a child's route on a shared copy.

Exact model and source document

Confirmed strap adjustment and case information

Parent app identified from the manual

SIM and operator questions answered

Ordinary calls checked in both directions

Settings and authorised adults reviewed

Backup family arrangements discussed
